VIVA HIGH PHOSPHOROUS COMPOUNDS

Viva high phosphorus fertilizer powder manufactured with great care to meet all the plant needs from phosphorus and other trace elements.

- Mineral fertilizer contains a high percentage of phosphorous and other elements, which is considered an essential part of the process of photosynthesis.
- Contains a measured ratio of nitrogen and potash, which are essential for plant growth.
- Low acidity coefficient and this helps to speed up absorption and leads to an increase in readiness other nutritional elements and increasing the permeability of nutrients through the leaves.
- Helps in the growth of the root system in plants and helps in the formation of flowers and side branches of plants.
- Fast absorbing fertilizer by the roots and moves quickly inside the plant parts.
- It is effective in all climates and agricultural seasons and can be mixed with different stimulants and fertilizers.

Features of use:

- It is used during the first growth stages to promote root growth and development.
- It is recommended after moving the seedlings to the permanent location, as well as in the seed germination stages.
- Causes an increase in the size of the root system and thus an increase in the ability of plants to absorb nutrients.
- Improving flowering efficiency, fruit set, seed production, and formation.
- (It is used in all irrigation and foliar sprinkler systems.)

Packing: 1-10-20-25 kg
