PURE PLUS CAL-MAG LIQUID

- A compound liquid fertilizer used within the typical fertilization programs to treat soil salinity and to alleviate the negative effects in irrigation water and the rate of its accumulation in the soil and dissolves sodium and chlorine salts and washes them away from the root area.
- Buoyed by calcium and magnesium for the plants, it is designed to make up for shortfalls of these two elements in most types of soil, which helps to:

Features of fertilizer:

- Cell division, plant tissue development, bloom and node processes in a plant.
- Help the absorption of water and carbon dioxide.
- Stimulate growth and speeds up the maturation process.
- Reduce the decay of the tip of a blossom (on tomato and cucumber crops) and burn peak on Lettuce and pointed cabbage crops.
- Reduce the dryness of flowers and help the node processes in plants.
- Reduce yellowing of leaves.
- Reduces plant stunting.
- Dissolve quickly and help reduce the percentage of falling flowers and fruits.
- Magnesium is an essential element in the formation of the Chlorophyll molecule thus it's an important in the formation of photosynthesis.
- As that the Magnesium component enters the formation of cell walls and it's a tonic agent for a number of Enzymes.
- Prevent the formation of rolled paper upward.

(It is used in all irrigation and foliar sprinkler systems)

Packing: 250 MI - 500 MI - 1 liter - 5 liter - 10 liter - 20 liter
