

HIGH FEED

30-30-30 + 1% MgO + TE

NPK

Chemical Composition (w/v):

- Total Nitrogen (N): 30%
- Phosphorus (P_2O_5): 30%
- Potassium (K_2O): 30%
- Magnesium (MgO): 1%

HIGH FEED Advantages:

- A balanced compound fertilizer containing nitrogen, phosphorus, and potassium in a 1:1:1 ratio, making it suitable for all stages of plant growth.
- High-quality fertilizer enriched with essential macro and micro elements necessary for plant development, providing strength and stimulating vigorous vegetative growth.
- Suitable for use in all types of agricultural soils and compatible with various irrigation and fertilization systems.
- Enhances photosynthesis efficiency, reduces nutrient deficiencies, increases productivity, and improves overall crop quality.
- Promotes strong root system development and supports flower formation and lateral branching.
- Rapidly absorbed by plant roots and quickly translocated within plant tissues.
- Effective under all climatic conditions and growing seasons, and compatible with most fertilizers and pesticides.
- Low salinity fertilizer that helps reduce soil pH, improves nutrient availability, and increases cation exchange capacity (CEC) in the soil solution.

Suitable for all irrigation systems and foliar spraying.

Packaging: 1 – 5 – 10 – 20 kg
