Root Activator & Stimulator

Highly Effective Water-Soluble Fertilizer

7-47-6 +3 % Amino Acids +15 % Organic Matter

Chemical Composition (w/w):

Nitrogen (N)	7 %
Phosphorus (P ₂ O ₅)	47 %
Potassium (K ₂ O)	6 %
Amino Acids	3 %
Organic Matter	15 %

Features & Benefits:

- Improves soil structure, increases aeration, and stimulates the growth of beneficial microorganisms, preventing soil compaction.
- Enhances fertilization efficiency by reducing nutrient fixation in the soil and making them more available for plant uptake.
- Activates root growth and promotes the development of strong, deep root systems, improving the plant's ability to absorb water and nutrients.
- Increases plant tolerance to harsh conditions such as high salinity, drought, and environmental stress.
- Stimulates flowering and fruit set, increases fruit size and uniformity, and improves marketing quality.
- The potassium content improves fruit quality in terms of firmness, color, and sugar content, enhancing final yield quality.
- Highly soluble in water and fully compatible with all irrigation systems and foliar application without clogging issues.
- Suitable for organic agriculture; derived from natural sources and safe for continuous use.

Packaging:

1 kg – 10 kg – 25 kg
