

PLUS PURE

6-40-12 +11% Ca +TE

Chemical Composition (w/v):

Total Nitrogen (N): 6%

Phosphorus (P_2O_5): 40%

Potassium (K_2O): 12%

Calcium (Ca): 11%

Pure Plus Advantages

- A suspension compound fertilizer rich in phosphorus, designed to enhance root development, increase flowering, and improve fruit set throughout all plant growth stages.
- Contains calcium, which strengthens cell walls, increases root and stem firmness, and reduces blossom-end rot and fruit cracking problems.
- Enriched with essential micronutrients such as iron, zinc, manganese, and copper, preventing nutrient deficiencies and supporting healthy vegetative and reproductive growth.
- Micronutrients enhance chlorophyll formation and photosynthesis, increasing the plant's ability to produce energy and achieve balanced, healthy growth.
- Improves the uptake of phosphorus, calcium, and micronutrients from both soil and leaves, resulting in better fruit quality and higher yields.
- Suitable for all soil types and irrigation systems, including drip irrigation and foliar application, ensuring uniform nutrient distribution.
- Ideal for crops requiring high levels of phosphorus and calcium such as tomato, pepper, cucumber, fruit trees, and legumes.
- Safe formulation for all crops when applied according to recommended guidelines, ensuring healthy crops, high productivity, and superior quality.

Suitable for all irrigation systems and foliar spraying .

Packaging: 1 – 5 – 10 – 20 kg
