

ALPHA

ZINCOPHOS

NPK Compound Liquid Fertilizer with High Phosphorus and Zinc

8-20-0+8% Zn

Chemical Composition (w/v)

Liquid fertilizer containing the following proportions:

Nitrogen (N): 8%

Phosphorus (P_2O_5): 20%

Zinc (Zn): 8%

Features

- Provides plants with zinc, which is essential for increasing chlorophyll and carbohydrates in plants and increasing plant productivity by 30 %
- Increases plant production by accelerating chlorophyll. Zinc plays a role in the synthesis of plant growth hormones, including auxins.
- Provides protein and vitamins to plants and increases the effectiveness and resistance of plant roots in various soil types.
- Increases plant resistance to root diseases and Zinc helps increase the plant's ability to withstand cold weather.
- Zinc contributes to maintaining plant cell membranes.

Packaging

250 ml, 500 ml, 1 liter, 5 liters, 10 liters, 20 liters
