TE MIX Trace Elements

Iron 6%+Manganese 3%+Zinc 3%+Copper 0.5%

Boron 0.3%+Amino Acids: 9.53%+Sulfur 11%

Composition (w/w):

Total Iron FeSO ₄	6 %
Total Manganese MnSO ₄	3 %
Total Zinc ZnSO ₄	3 %
Total Copper CuSO ₄	0.5 %
Total Boron B	0.3 %
Amino Acid	9.53 %
Total Sulfur S	11 %
Total Magnesium MgO	3 %

Advantages:

- A balanced micronutrient formulation containing iron, copper, manganese, zinc, and boron, designed to correct and prevent micronutrient deficiencies.
- A comprehensive blend of chelated micronutrients in powdered form, providing economical and effective nutritional benefits for a wide range of field and horticultural crops.
- Contains sodium-free amino acids, which act as protein synthesis enhancers and improve overall plant metabolic activity.
- Amino acids function as natural chelating agents, enhancing micronutrient availability and facilitating their uptake and translocation within the plant.
- Enhances plant tolerance to adverse environmental stresses such as heat, drought, salinity, and frost.
- Easily absorbed by plants without causing physiological stress, resulting in rapid and effective plant response.
- High nutrient uptake efficiency due to its acidic reaction and advanced chelation properties.
- Safe for use on all crops when applied according to recommended rates and guidelines.

Packaging:

1 kg – 10 kg – 25 kg
